PROFESSIONAL PROFILE

Bachelor's degree holder in Systems Engineering and Full Stack Developer with experience building production-grade systems using **Node.js**, **TypeScript**, **React**, **Electron**, and **Python**. I have delivered enterprise platforms with **REST APIs**, **WebSockets**, **MySQL**, **Redis**, **Docker**, **CI/CD**, analytics, in-person payments, data automation, and hardware integrations, covering architecture, backend, frontend, deployment, and operations.

WORK EXPERIENCE

Full Stack Developer | **HOLINSYS**

Jan 2026 – Present

Development of Depilab solutions for marketing, analytics, in-branch payments, automation, and cloud integrations.

MARKETING MANAGEMENT SYSTEM - DEPILAB

Node.js TypeScript React MySQL Redis Playwright

- **End-to-end ownership:** independently developed a full-stack platform for campaigns, influencers, promo codes, BI dashboards, and automated social media scraping.
- **Production architecture:** modular backend with 15 modules, 37 Sequelize models, 4-database integration, granular permissions, full audit trail, and dynamic configuration without restarts.
- **Operations & data:** implemented BullMQ/Redis queues, 11 manageable cron jobs, circuit breaker, rate limiting, Prometheus metrics, Winston logs, and Docker/TeamCity deployments.

NIUBIZ PINPAD PAYMENT SYSTEM - DEPILAB BRANCHES

Electron React Node.js Socket.io Capacitor Niubiz

- **Distributed system:** built the end-to-end integration between Android self-service tablets, Windows reception PCs, cloud backend, and Niubiz/Ingenico POS terminals.
- **Fault tolerance:** real-time WebSocket communication with HTTP polling fallback, payment state machine, and local-first persistence to prevent double charges during network failures.
- **Native integration:** Electron app with typed PCL POS Bridge driver, PDF voucher generation, ADB/scrcpy tablet streaming, and a Capacitor Android plugin for the Ingenico USB SDK.

ANALYTICS, TRACKING & COMMERCIAL AUTOMATION

Node.js MySQL AWS SES Mautic Docker

- Developed web traffic, UTM, and conversion funnel tracking from first visit to purchase, including abandonment analysis across the appointment booking flow.
- Implemented transactional email infrastructure with AWS SES and Mautic for registration, account recovery, appointments, and purchase confirmations.

Support & Development Analyst | **ESCIENZA E.I.R.L.**

May 2025 – Dec 2025

Promoted from Intern (May-Sep) to Analyst (Oct-Dec)

FINANCIAL RECONCILIATION MANAGEMENT SYSTEM

Python PHP MySQL JWT

- **Critical Impact:** Reduced monthly reporting time by 70% (from **7 days to just 2 days**) through end-to-end workflow automation.
- **ETL Automation:** Developed Python scripts for the ingestion, cleaning, and automatic cross-referencing of massive datasets (Excel/CSV) from multiple sources (Nubox, EDSuite, SIRE).
- **Security:** Implemented robust JWT authentication with an "impersonation" feature for centralized branch management.

DISTRIBUTION & INVENTORY SYSTEM

React Node.js MySQL

- Full Stack development for inventory and sales digitization at a consumer goods distributor, eliminating manual stock discrepancies.

CORPORATE WEB REDESIGN

Astro SEO

- Visual reengineering using **Astro**, significantly improving Core Web Vitals and user experience (UX).

FEATURED PROJECTS

Restaurant Management System - RestCabaña

NestJS React Native TypeScript WebSockets Docker

- **Scalable Backend:** Modular REST API in NestJS using WebSockets for real-time ordering and payment gateway integration.
- **Mobile App (React Native):** Customer and staff application featuring advanced state management (Zustand + React Query) and fluid navigation (Expo Router).
- **Infrastructure:** Containerized deployment with Docker and data persistence using MySQL and Prisma ORM.

TECHNICAL SKILLS

LANGUAGES & BACKEND

JavaScript, TypeScript, Node.js, Express, NestJS, REST APIs, PHP, Python, Java.

DATA & ARCHITECTURE

MySQL, PostgreSQL, Redis, Sequelize, Prisma ORM, ETL, BI, WebSockets, distributed systems.

FRONTEND & MOBILE/DESKTOP

React, React Native, Electron, Capacitor, Astro, Tailwind CSS, Ionic.

TOOLS & DEVOPS

Git, Docker, CI/CD, TeamCity, AWS SES, Mautic, Playwright, JWT, OAuth2, Prometheus.

EDUCATION

Bachelor's Degree in Systems Engineering

2021 – 2025

National University José Faustino Sánchez Carrión
